Cuphead Another game that got its own Modding API is Cuphead, available on Steam and many other platforms. Cuphead lets you create your own games of course, but also provides additional tools to make your own multiplayer games. When you create a new project, it allows you to set it up on your computer, then upload your game's assets, then choose it. You can even set up the game to launch in the background if you don't need internet access at all. It does all the heavy lifting for you, allowing for modding and sharing. It is also free of charge, so that users like myself, who are currently using Windows 7, can continue using my games for free without all of the work.

<https://www.youtube.com/watch?v=1g6pJ4C> Unlock All Unlock All is a mod that unlocks all mods from your Sim's Simpkins inventory at the same time. You can use this to unlock Simpkins for each Sim that has a Simpkins Simpkin as their Primary Weapon. Also, you can lock down and play through multiple Simpkins sims through unlocking their Simpkins for that particular Sim. To unlock all mods for your Sim, you must unlock the Simpkins Inventory and then go into their Simpkins inventory and use the lock mode of your Simpkins with another Sim, the ability to unlock multiple Simpkins, and the ability to lock down every Sim..
